Groundbreaking event set to celebrate construction phase for the new Agricultural Science Center

What: The AISD is set to break ground and kick off the construction phase of the new Agricultural Science Center. The districtwide facility is part of the district's \$663.1 million bond program approved by voters in 2014.

The 23,000-square foot Ag Science Center will house agricultural science projects for students from all AISD high schools. The building will include 54 flexible-fencing pens for goats and sheep, 14 heifer pens, rabbit pens, an animal exercise area, a metal construction lab and two classrooms. The state-of-the-art facility will be the district's first net zero building. [Click here for more information about the Ag Science Center.](#)

Who: Arlington ISD Superintendent Dr. Marcelo Cavazos, board members, elected officials, community members and students

When/Where: 2 p.m. on Thursday, March 30, 2017
Agricultural Science Center
3210 West Pioneer Parkway, Dalworthington Gardens
